

The original equipment (o/e) fitment battery for the FJR is a GS GT14B-4 sealed 'MF' type and retails at Yamaha dealerships for about £140.00 at time of print. We can supply a virtually identical battery for 60% cheaper. We now only supply equivalent quality batteries for the FJR as 'budget' batteries (Approx. £40) seem to fail early and are not good value for money.

VARTA BATTERY

Optional High quality German battery

R.R.P. £140..00

BAT-FJR O/E battery **£75.00**

OPTIMATE BATTERY CHARGER

The unique 5-step battery optimiser specially designed for all modern 12V starter batteries from 2.5 to 28 Amp-hours capacity. Diagnoses, recovers, charges, checks & maintains your battery automatically for months. All major battery manufacturers recommend maintaining starter batteries FULLY CHARGED during periods of non-use. OptiMate IV is totally safe for months-long connection and maintenance of irregularly or seasonally used batteries even while still connected to the vehicle. Suitable for all types of rechargeable batteries. Just connect the OptiMate IV to your battery, the rest is automatic. Electronically protected against user errors. There is no switch, no fuse and there are no sparks.

Club recommended for the FJR1300 battery
This is the Bench Mark battery charger recommended by 8 major motorcycle manufacturers

BAT-OPT battery charger **£ 52.00**

HEATED GRIPS

Daytona Heated Grips are a quality grip made in Japan. They have a tri-way control, ie. Start for initial heat build up or for very cold conditions where they will draw 57 W, on for normal running conditions drawing 14W in chilly weather and off. Unlike inferior grips the rubber is of a high quality and doesn't look 'cheap'.

They come with specific fitting instructions for the FJR and are straightforward to fit. The most technical part of fitment is to lift the petrol tank!. Fitted in conjunction with the hand protectors listed elsewhere in this catalogue you should never suffer with cold and wet hands again.

DE-GRIPS Daytona Grips **£50**

YAMAHA POWER SOCKET

Auxiliary Power Socket as supplied by Yamaha. Simple battery connections allows you to connect mobile phones etc. Comes with fitting instructions.

Y-SOC Power Socket **£36.00**
