In Case of Emergency 'Dogtag'

Recognised by emergency services worldwide

This neat USB 'dogtag' is perfect for those who travel abroad. It can be a one stop location for all those important details.

In an emergency (like an accident) medical staff can obtain all your personal medical records. Also important is for them to know things like if you are a diabetic or a person to contact in an emergency like your partner etc..

This is achieved by simply putting the dogtag into a computers USB port, it automatically boots up and displays vital information you have uploaded.

2) You can also add personal information that would be useful if you ever lost your wallet or your Passport etc. Details of your: Passport number; Recovery company i.e. AA or RAC telephone number, Motor Insurance details etc..

Stores vital personal information on a USB device

D-TAG: Data Dogtag **£20**

Morgan Vacuum Gauges

Simple to use vacuum gauges that allow you to set up the balance of your 4 injectors. Comes with simple detailed instructions and will save you money instead of paying your dealer for adjustment.

Vac-gauge Vacuum Gauges **£55**

TUBELESS TYRE REPAIR KIT

Professional tyre repair kit that is a must for any tourer. Allows roadside repairs to punctured tubeless tyres. Comes complete with air canisters and instructions. *All manufacturers void their tyre warranty if you use tyre slime and the like.* Foam sealants are not recommended as when you come to have your tyre professionally repaired, vulcanising is virtually impossible due to the mess that it creates inside the tyre.

TRK Emergency Tyre puncture repair kit **£28**
