

The following lubricants and protectants are the same products that the club workshop uses all year round. Products marked with * are highly recommended and excellent value.

Morris PRIMA hard surface conditioner
Instant valet in a can! Spray onto any plastic parts leave a few minutes and wipe off to reveal an as new look. Cleans, protects and restores colour. Ideal for inner fairing panels.

*** M-PRIMA** prima conditioner **£5.50**

Morris SOLVENT CLEANER
A powerful blend of solvents for highly effective cleaning. Removes all kinds of grease and grime, ideal for brakes, clutch and bearings. Quick drying with no residual film.

M-SOL-C solvent cleaner **£4.75**

Morris PRISE anti-seize spray
Prise is a light grease with metallic lubricating solids (copper). Allows easy dismantling even after extended periods. High temperature resistance. A good alternative to copper grease in a tub as its less messy, just point and shoot.

*** M-ANTI** anti-seize spray **£5.50**

Morris MD4 maintenance spray
4 in 1 multipurpose maintenance spray. Cleans, lubricates, penetrates, and displaces moisture. Helps free seized fasteners. Drives out damp from electrical components. The best multi-purpose spray I have used to date.

*** M-MD4** maintenance spray **£4.00**

SCOTTOIL FS 365 PROTECTOR

Scottoils FS365 protector spray is a worthwhile addition to your armoury against rust and corrosion. Just spray your bike all over with its wide dispersion nozzle, it only takes about 20 seconds!, and it will protect your FJR against corrosion and neutralise winter salt. Its water soluble so washes off easily, just re-apply after every wet run. Great for coating your bike when it's laid up over winter.

*** FS365** scotoil FS365 protector **£6.80**

ACF 50 Anti-corrosion formula

Proven by the U.S. Navy on their aircraft carriers and used by Boeing on their aircraft fleet. This new spray chemically neutralises salt and repels water. Kills corrosion on contact and even shines your plastic. Use on the whole bike (except Brakes!) including engines and exhaust pipes (smokes on start up). Use also as a lubricant and penetrant. Ideal for bikes used all year round. Fantastic on switchgear. On unexposed areas reapplication isn't required for approx. 12 months. I've been using this on my FJR and have been well impressed!

*** ACF-50** Anti corrosion spray **£12.75**

Morris PAVAN engine cleaner
Powerful, water washable, non caustic cleaner. Breaks down grease and grime from any motorcycle surface. Ideal for cleaning engines just spray on, leave for 5 minutes and wash off.

M-ENG-C pavan cleaner **£3.00**

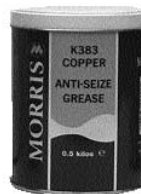

GREASE

Morris RACE GREASE

Morris race grease is a waterproof, very high melting point, multi applicational grease especially ideal for linkage, wheel, and steering head bearings.

*** M-R-G** morris race grease **£5.00**

Morris COPPER GREASE

Morris copper grease is perfect for lubricating threads and shafts, pivot points etc. and allows easy dismantling even after extended periods. **Especially recommended for use on linkage bolts and shafts.**

*** M-C-G** morris copper grease **£5.00**

COOLANT

Morris SUPER COOL coolant

Morris super cool is a ready mixed, universal, engine coolant, suitable for all types of water-cooled engines, and saves messing around with distilled water and ratios etc; just pour in the recommended quantity and your done. 1 litre container. **(3 litres is enough for a FJR coolant change)**

M-COOL coolant **£4.00**

SHAFT DRIVE OIL

Morris SHAFT DRIVE oil

Morris race gear oil is a fully synthetic 75w gear oil developed especially for motorcycle gearboxes and shaft drive gears and is the equivalent oil to Yamahas shaft drive oil that they sell for £30.00 L. **Other oils may not offer the same protection.**

M-GEAR Gear oil **£12.00**

RADIATOR CLEANER

Add contents of can to the main radiator filler and run engine for 1/2 to 1 hour. Then drain coolant as normal. this additive removes all the muck and calcium buildup ensuring a clean coolant system.

RAD-CLEAN Rad Cleaner **£6.00**
